ATTORNEY GENERAL
STATE OF FLORIDA

Florida Attorney General's Office News Release

Enough Fentanyl Seized to Kill All of Florida

TALLAHASSEE, Fla.—Attorney General Ashley Moody is announcing, that in just the past few months, authorities have seized enough fentanyl that could kill the entire population of Florida. This announcement is following an 11-pound drug bust by the [Polk County Sheriff's Office](#), a record-breaking seizure for the agency. This terrible news comes as Attorney General Moody continues to fight in court to force Biden to secure the border and stop the influx of this deadly drug.

Attorney General Ashley Moody said, “This is terrible news, and I am afraid it will only get worse. With enough fentanyl seized in just a few short months to kill the entire population of Florida, it’s not hard to imagine how much is being sold on our streets undetected. While Florida law enforcement is doing a tremendous job interdicting deadly drugs, if Biden will not do his job and secure the border, our state will be overrun and the death toll from fentanyl overdoses will continue to increase.”

Earlier in October, Attorney General Moody announced a massive drug bust involving more than 50 pounds of fentanyl. To read more about the major drug seizure, click [here](#).

Additional fentanyl cases from around the state in the past few months include:

- [Oct. 10, Hernando County Sheriff's Deputies seized 1.2 pounds of fentanyl;](#)
